Closing remarks

LIST OF PRESENTING COMPANIES

COMPANY	LOCATION	DIGITAL SOLUTION	WEB
Pro-Bit programska oprema d.o.o.	Slovenske Konjice, Slovenia	PRO-BIT offers comprehensive IT solutions, which modern companies need to build a complete information system with an emphasis on the processes for successful business operations.	http://www.pro-bit.si
Energy Pulse d.o.o.	Novi Sad, Serbia	If you want to save on downtime when your machine breaks down - \$6,720 if you work in two shifts, or \$10,080 if you work in three shifts, do an EKG of each of your machines with the help of Energy Pulse's innovative products. You will have real-time data, be able to do predictive maintenance, do event forensics, do data-driven forecasting, make effective & fast decision making, and you will finally attract new customers who are environmentally conscious. Applicable in: manufacturing sector	https://energypulse.org/
Eco hive d.o.o.	Belgrade, Serbia	If you want to defeat varroa in an ecological and automated way with 95% efficiency, Eco hive offers you a patented device for ecological removal of varroa, without the need to pass a withdrawal period, and varroa does not develop resistance. The result is a 60% increase in your income by selling organic honey. Applicable in: (non) organic honey production	https://www.linkeedin.com/company/eco-hive-doo/
MIKROCOP d.o.o.	Ljubljana, Slovenia	The company Microcop digitalizes business processes and create the environment for digital transformation.	https://www.mikrocop.com/
Festo d.o.o.	Trzin, Slovenia	To speak about driving green skills in a balance between education supply and industry demand will be key for the future. With Festo LX we create a digital learning portfolio, a soft- & hardware architecture, which is more than just the sum of its parts. Improved customer satisfaction through seamless and personalized customer journey, securing new revenue streams and saving and improvement of business processes through more efficient customer or partner relationships. Applicable in: industrial and education sectors	https://www.festo.com/
		If you want to be competitive on the market, you should know and feel the equipment and processes at the shop floor. With Festo AX it is possible to gather	

and process real time data in order to detect anomalies, optimize energy consumption and predict failures before they actually cause production stop. Having an industrial intelligence system with modular design (Predictive Energy, Predictive Quality, Predictive Maintenance...) is nowadays becoming a standard to successful manufacturing companies.

Applicable in: Factory automation and manufacturing

Metronik d.o.o.
